About us

Company Introduction

Based in Dubai, UAE, Top Vantage Contracting LLC currently engages in construction and procurement projects that spread in UAE, KSA, and Iraq. We are mainly working with all the big oil companies having on-going projects in the aforementioned countries, such as ADNOC from UAE, Aramco from KSA, SKEC from South Korea and CPP as well as CPECC from China, from who we have received highly favorable comments and constant requests to keep working with them.

In Middle-east countries, we are mainly devoted to oil & gas industry services of camp construction, logistics service, earthwork, civil construction, steel structure installation, and materials supply; Retail and Media services. Our workforce is comprised of more than 100 Chinese workers and 200 labors from other countries.

Construction Experience

Construction Experience

In recent year, Top Vantage Contracting LLC has made great progress in the construction & oil field industry in Iraq, UAE, KSA and China and reached a consensus and cooperation with many oil & construction companies. It also wins a good reputation on the external procurement, camp construction, civil construction and steel structure construction.

The projects that Top Vantage Contracting LLC has completed in these years include: ADNOC Camp Construction, Civil Works of M Projects ,BIFP Civil Construction in UAE, Halfaya Valve Stations Construction, Rumaila Camp Construction, Nassiriya Tank foundation construction in IRAQ . Camp Construction of TCF1 in KSA and Logistics services in all over middle-east.

As a construction enterprise with both Chinese and non-Chinese employees in Iraq, Top Vantage Contracting LLC is developing speedily in these years. And Top Vantage Contracting LLC often acts as a CONSTRUCTION contractor in the project contracting which accumulated rich experience during the construction process of designing, procurement and construction.

Construction Experience

Presently, we are working on the following projects:

1. Bab Integrated Facilities Project (ADNOC) for civil work;
2. Saudi Aramco TCF1 for camp construction;
3. Saudi Aramco North Gas Compression Plant (NGCP) Pipelines for concrete foundation prefabrication.

Bab Integrated Facilities Project (BIFP)-CPECC :

160km southeast to Abu Dhabi and having the construction area of 45km*25km, the project aims at producing gas to GASCO for treatment and processed crude transporting to ADCO outgoing network. The project system includes Oil Gathering Facility, Off-station Pipeline, Water Injection System, and Transportation Transformation. OHL project period is 26 months (subcontracting) and facility construction period is 27 months except BCDS, which will be 33 months.

Construction Experience

In BIFP, there are altogether 3 precast yards and our team are working on Precast Yard #3, primarily in charge of producing concrete foundations such as pipe sleeper, pipe support, cable trench, valve pit and weir manhole. Even though the client ADNOC has a more strict construction standard than in non-oil-filed projects, making the producing process tougher, our team accommodated the high working standard in a very short time. Since February 15, 2019, we have been working in the project for more than 10 months and have become the major precast team for the whole project.

Apart from management staff, our team in the Precast Yard currently has 35 Chinese workers and 20 in other nationalities. Moreover, at the mean time there is a non-Chinese construction team in Abu Dhabi Massafah precast factory, where we adapt steel mold instead of wooden mold to produce larger quantity foundations. Depending on construction difficulty, the two teams are able to complete 1600-2400 cubic meters of concrete foundations monthly.

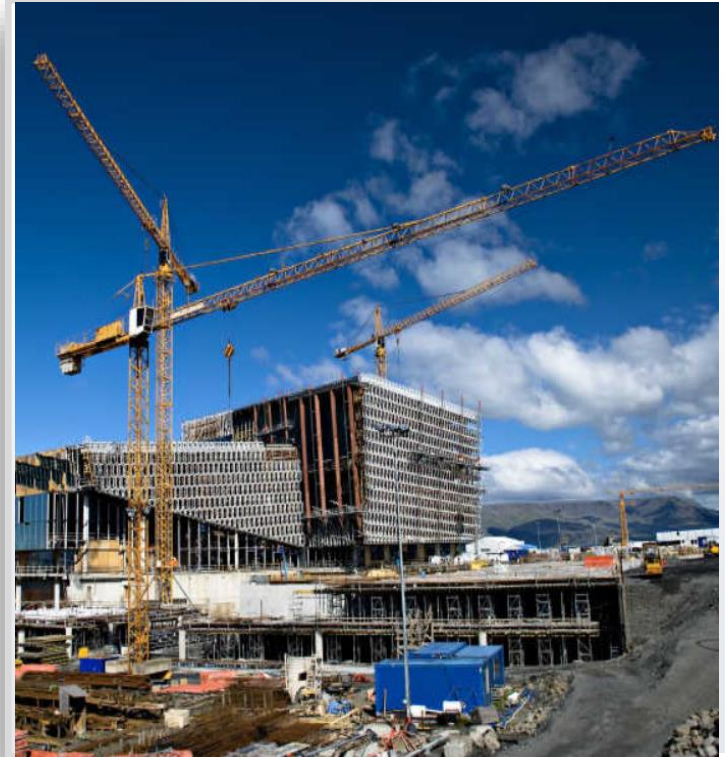

Construction Experience

Saudi Aramco TCF1 for camp construction :

Harrade Camp Construction project covers an area of 10 square meters and is able to inhabit around 2000 persons. The work range of the project includes civil work such as site leveling, excavation, embankment and concrete prefabrication, all sorts of steel structure work, installation and connection of caravans, generator power supply service, fire-fighting system under Aramco standard, waste supply and drainage, municipal projects like greening, paving asphalt roads, building drip irrigation system as well as weak current projects like monitoring, TV and network system

Construction Experience

Saudi Aramco North Gas Compression Plant (NGCP) Pipelines for concrete foundation prefabrication.

From south of Harrade to its north, the pipeline length of the project is 900km, connecting several oil wells as well as major oil and gas stations. The overall project period is 4 years.

In this project, there are two concrete foundation precast yards. Our team is working in Precast Yard #2, which is the main yard, and Precast Yard #1 is subsidiary production yard. Our team are comprised of more than 100 Chinese and non-Chinese employees. Some of the bigger foundations are arranged for on-site casting. We are executing the Aramco construction standard, which aligns with the European and American Standards. Although the Standard is very strict, we have fully acquired and expertly applied after constant learning and adjusting. Hence, we have become one of the major construction teams in the project. While prefabricating concrete foundations, we are gradually start the works of excavation, embankment and foundations installation.

Completed & Ongoing Projects

- 2# Camp Materials Supply and Construction Work Bab Integrated Facilities Project
- Bab Integrated Facility Project Concrete Foundation Prefabrication
- Fujairah Site Preparation, Soil Improvement & Earthworks for M Project
- Provision of EPC Service of PSC Camp Extension for Halfaya Field Base Phase II
- Auxiliary Products Procurement of CPP Block Valve Station
- Camp Project for CPP Badra Oilfield Well Gathering System EPC Project
- Majnoon Steel Structure Kitchen and Restaurant Construction
- Steel Structure Workshop Construction in Iraq for Maintenance & Emergency Repair Co
- Phase II Supporting Camp Construction for Maintenance & Emergency Repair Co
- Halfaya Camp Construction & Caravan Procurement and Installation
- Rumaila Camps Construction & Caravan Procurement and Installation

Completed & Ongoing Projects

- Kut Camp Construction for Badra Oilfield Export Oil Pipeline EPC Project
- Landy Technical Services
- Ancillary Works for Thrust Boring
- Camp Construction in Juaymah Area
- Ancillary work for open cut road crossing
- Miscellaneous works in Qatif Camp
- Provision of TV Satellite System and Installation Services
- Concrete works for NGCP project
- Camp construction of TCF1 in Harad
- Camp Logistics Service for Free Flow Pipeline Project
- Engineering, Procurement, Construction and Commissioning of Missan Crude Oil export Pipeline Project
- Engineering, Procurement, Construction (EPC) for New Nassiriya Depot Project

Steel Structure Installation

Steel Structure Installation

Top vantage has developed an excellent reputation and strong presence as one of the regional's premier steel fabricator and erector. Our research and development team are striving to deliver the best solution in the steel industry.

Top vantages range of erection capabilities includes all kind of steel structures (low, medium and high complexity) such as:

- ✓ Warehouse and distribution centers
- ✓ Office complex
- ✓ Showrooms and production facilities
- ✓ Shopping center
- ✓ Power plants
- ✓ High rise buildings
- ✓ Oil and gas structures

There has been a continuous effort to provide customers with the most efficient, effective and safest full-service steel construction. Furthermore, by utilizing the abilities and knowledge of our existing employees, Top vantage can successfully perform any size project and provide clients with premier construction resources. No matter the size, complexity or location of your project, we can provide you with personalized service, reliability, and quality construction you deserve.

Trading

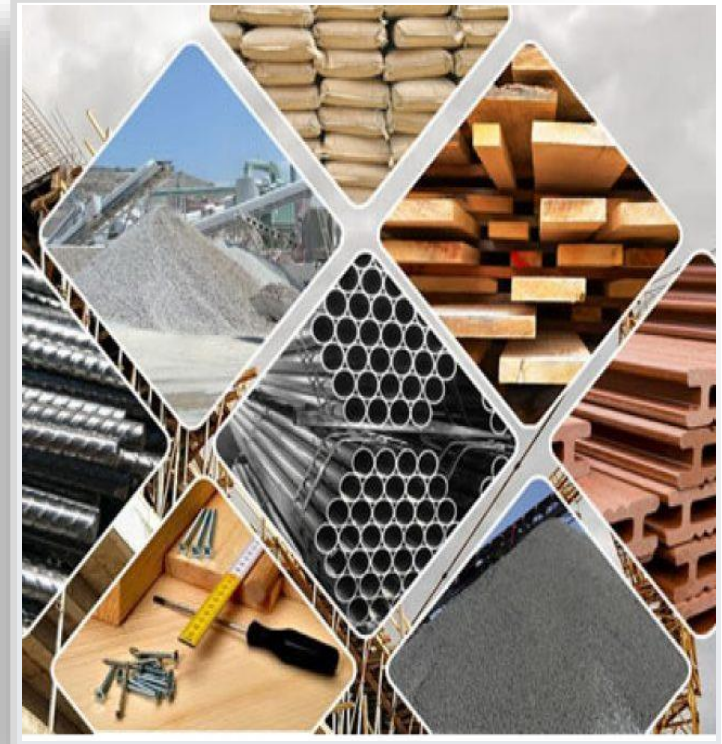

Trading

We focus on Trading, Materials supply, Custom Clearance, transportation and installation of tent and marched human resource service. As the exclusive agency of the businesses facing Chinese customers of many large-scale professional camping house and Constructional Materials supply and custom clearance for the cargo from China and U.A.E at port of Iraq, our company can provide you one packaged service, PEB steel construction and tent and the field erection and test run, as well in-house facilities, such as furniture, electrical equipment and so on. In recent years, our company have taken many camp materials supply projects in Iraq. We have finished the Badra, Halfaya, Rumalia and West Qurna camp construction Materials supply for CPP, offered CPP almost 600 units Containers materials supply for Badra, Halfaya, Rumalia Project and PEB steel structure workshops and dining rooms for CPP Halfaya Project and Maintenance & Emergency Repair Co.

we can provide professional supplies in purchasing service for clients. It is equipped with a purchase team having complete organizational structure in Dubai, Iraq and China. It purchased generator sets for CPP Badra, Halfaya Project and will provide supplies purchasing service for each enterprise of CPP in a long time.

Procurement & Materials Supply

- Welding Machine and Welding Materials
- Generators & Air Compressor / UK USA
- Cables & Wirings with various size and models
- Heavy Construction Equipment/Loader, Mobile Crane, JCB
- PVC,PPR,UPVC Plastic Pipe & Fittings Connector
- Tubes for Oil Field /ASTM API DIN Standard
- Steel Plate & Bar, angle Steel
- Control Panel DB SMDB MCCB/ ABB
- Pre-engineered Metal Building/ PEB
- Air Conditioner/ GREE/CARRIER/ SUMSANG Food and Vegetables Supply to the Camp
- Constructional Materials/ Cement board, Floorings, Ceilings, lighting, Fans
- Diesel generator (75-2000kw)
- Air compressor
- Lighting fixture
- Lighting pole
- Lighting tower
- ELECTRICAL BULK MATERIALS
 - welding machine
 - Armored cable (LV.MV.HV)
- VALVES
- PIPES
- FLANGES
- Oilfield Supplies & Building Materials Trading
- Insulation, Cladding & Accessories Materials
- Scaffolding & Scaffolding Materials (Buildings & Oilfield)
- Anti-Corrosion Products
- Fireproofing Equipment's & Spare parts
- Industrial Welding Materials
- Power Tools & Machineries
- Tools & Consumables
- Personnel Protective Equipment (PPE) Supply
- Detectable & Non-Detectable Warning Tapes
- Electrical Cables (LV, ELV, HV)
- Sandblasting machine and all kinds of testing & inspection equipment
- Rigging Hardware
- Excavation and Back Filling
- Cable Pulling and Skilled Man Power
- Piping/ Pipe Fittings/Valves & Mechanical Fasteners
